

## ARCHITECTURAL CONTROL COMMITTEE

During the past year there have been no new homes started within the Retreat. This is probably the first time for this since the start of the development in the early 1970's. All members are certainly aware of the economic conditions in our area and country, and they do impact construction. Many members have done work on their existing cabins with replacement roofs, small additions, and storage sheds among the work. For the coming year there are at least two new homes that are very close to the initiation of work. The ACC is always available to discuss your plans or concerns. The ACC would like to have several more members this coming year. Thanks to George and Thelma Richard, Jean Richard and Marylouise Widmaier for their participation; Marylouise has resigned from the committee. Submitted by Dennis Bicknell
