

Road Report March 18, 2011

The erosion of the culvert at 491 Copperhill has been fixed.

No replacement for the backhoe has been found. Anyone knowing of a low hour, 4 wheel drive, 310 John Deere or equivalent backhoe for sale please call Rich Gilmore or me.

Sections of the roads that have thawed enough are now being graded.

This year's application of recycled asphalt is now being planned and the details will be released when complete.
